PROFILE

Highly skilled Business Analyst with over a decade of experience in analyzing and interpreting business needs to drive organizational efficiency. Expertise in creating comprehensive business requirement documentation, facilitating change management, and ensuring successful project outcomes. Adept at leading business analysis functions within agile and traditional project frameworks, focussing on improving data quality and aligning solutions with business objectives.

WORK EXPERIENCE

Technical Business Analyst   **FEB 2023 – JAN 2024**
CAE / Infogain – *London, UK*
- Acted as the lead Business Analyst for CAE's Flight Plan Management Suite, overseeing the migration of key business applications from on-premise environments to AWS cloud infra.
- Developed and maintained comprehensive business requirement documentation, ensuring alignment with business needs and technical feasibility for seamless solution development.
- Conducted end-to-end system development lifecycle documentation, including feasibility studies, design, and implementation plans, steering customers from analysis to deployment.
- Collaborated closely with developers and technical teams, ensuring that customer requirements were clearly understood and accurately translated into technical solutions, leading to a 25% improvement in project delivery times.

Business Analyst (Delivery)   **JUN 2016 - JAN 2021**
Sabre Airline Solutions – *Bangalore, India*
- Led the business analysis function for Sabre's SaaS-based Crewing and Flight Ops software, acting as the primary liaison between business stakeholders and technical teams.
- Analyzed new divisional and corporate information business initiatives, preparing complex technical and non-technical documentation.
- Facilitated business acceptance testing and benefits reviews, ensuring that all solutions meet customer expectations and aligned with organizational strategies.

Technical Support Analyst   **SEP 2015 - JUN 2016**
Hewlett Packard Enterprise – *Bangalore, India*
- Provided Level 2 technical support for enterprise customers, specializing in troubleshooting custom in-house applications and Microsoft Office suite.
